To Whom It May Concern:

I am writing in regards to allowing funding for human with animal experimentation. I have three (3) concerns. 1) There should be no attempt to implant human brain or stem cells into animal brain cells. 2) No human sex cells or stem cells should be implanted into an animal's reproductive cells. 3) Human embryos and human embryo stem cells should not be used in any way, particularly if it causes the human embryo to die.

Sincerely,

Mary Jo Beyer
