Dear Office of Science Policy Comments:

Dear Sirs and Madams,

Please re-consider your proposal, to drop your moratorium on funds, involving human-animal chimeras. I believe that only our Creator-God is in charge of all humans and all non-human animals. Therefore, it is wrong to involve research on part-human and part-animal creatures. Also, it includes ethic problems of human embryonic stem cell research. I believe that all human life begins at fertilization or conception and so is to be respected as a person, God's gift to society.

Yours truly,

Rev. William Shaw, Pastor
