Getting Started: Preparing Your Single-project Application Using ASSIST

Step-by-Step

Before you begin: Know where to go for help

- The eRA Commons Help Desk is ready to help you if you have any problems using ASSIST

Step 1: Find a Funding Opportunity Announcement (FOA)

- Find a FOA of interest in the NIH Guide for Grants & Contracts
  - Remember the FOA Number (e.g., PA-13-304)
- If ASSIST is a submission option for your chosen FOA, there will be an ‘Apply Online Using ASSIST’ button just above the FOA Table of Contents that will take you to the ASSIST system

Step 2: Make a submission plan

- Decide who will be responsible for data entry in ASSIST and gather their eRA Commons IDs

Step 3: Login to ASSIST & Initiate Your Application

- Login to ASSIST at [https://public.era.nih.gov/assist](https://public.era.nih.gov/assist) using your eRA Commons account
- Use the Initiate Application feature and your FOA number to get started on your application
  - Or, access applications already in progress using the Search feature

Step 4: Provide application access to your team

- Automatic Edit access is given to:
  - All SOs (Signing Official) and AOs (Administrative Officials) at the applicant organization
  - The PD/PIs designated on the application
  - The user that initiated the application
- Access can be given to additional users (or revoked) using the Manage Access action

Step 5: Enter Application Data

- Use the tabs across the top of the screen to move between forms
- Complete the R&R Cover tab first (forward populates information to other forms)
- Multiple users can simultaneously work on your application, but only one user at a time can Edit an individual form
- Use the Validate Application action to check your entered data against NIH business rules

Step 6: Finalize your application and prepare for submission

- Use the Preview Application action to generate a draft application image in the agency format
- Check the application image for any assembly issues
- Use the Update Submission Status action to change your application from Work In Progress status to Ready for Submission status
  - If additional edits are needed, the application must be returned to Work In Progress status

Step 7: Submit your application

- Use the Submit button on the Summary tab to submit to the agency through Grants.gov
  - Only active for users logged into ASSIST with an eRA Commons account with the SO role
- Provide your valid Grants.gov Authorized Organizational Official credentials when prompted

Step 8: Track your application status and view your assembled application image

- Use the View Submission Status Details link to track your application status
  - If your application successfully processed through to eRA Commons, the 7-digit Agency Tracking # will be hyperlinked to the eRA Commons detailed status screen
  - Carefully check your assembled application image (e-Application) and associated documents in the Other Relevant Documents section of the screen

Getting Started: Preparing Your Single-project Application Using ASSIST

Navigating the ASSIST Screen

**ASSIST Action Notes**

**Manage Access**
- Provides interface to control who has access to your application and what they can do within the system
  - Access can be controlled across multiple variables: view/edit and budget/non-budget data
  - Access must be managed by users with the SO (Signing Official) role on their eRA Commons account
  - SOs can delegate Access Maintainer and Status Maintainer authority to other users

**Add Optional Form**
- Allows users to add additional forms to their application (e.g., Modular Budget, R&R Budget, Subaward Budget, Cumulative Inclusion Report, Planned Enrollment Report)
  - Available forms vary by Funding Opportunity Announcement

**Preview Application**
- Provides a preview of your application in the format used by the agency for review and funding consideration
  - Cover Letter or Appendices are not part of the application image (maintained separately post-submission)

**Validate Application**
- Checks your application data against agency business rules prior to submission
  - Form fields marked with an * must be completed before the system can validate that form

**View Status History**
- Provides history of submission status updates related to ASSIST actions

**Update Submission Status**
- Allows you to change your submission status Work In Progress, Ready for Submission or Abandoned
  - Your application must be error-free for the status to change from Work In Progress to Ready for Submission
  - Ability to set an application to Work in Progress is restricted to users with SO or AO roles on their eRA Commons accounts, users granted Status Maintainer authority through the Manage Access action, and the initiator of the application

**Submit**
- Submits your application to the agency through Grants.gov
  - Application must be in Ready for Submission status
  - Available to users with the SO (Signing Official) role on their eRA Commons account
  - Requires active Grants.gov Authorized Organizational Representative credentials

**Copy Application**
- Copies application data (excluding attachments) to a new application
  - If copying to a different FOA, a 'best effort' match is done

**Delete Application**
- Permanently deletes an application from ASSIST – use cautiously, once it’s gone – it’s gone!
