Record submitted by the grantee as type 5 and reviewed by NIH staff as a type 5. At time of release, system converts the type 5 to a **type 4** and increases document number.

Closeout of original competitive segment (years 1-5) will begin 90 days after end of the last budget period.

When the FY13 year award is issued, the project period end date will be changed to match budget period end date in the Commons. This makes the FFR for this year the final FFR and allows NIH to close the accounting record in the old system. Final Invention Statement and Final Progress Report not required at this time. A revised NoA for this year will not be issued.
