Submit other support for all new senior/key personnel, and updated other support for all senior/key personnel for whom there has been a change since the last reporting period.

Provide only active support for all new senior/key personnel. Provide updated other supported for all senior/key personnel for whom there has been a change in other support. If a previously active grant has terminated and/or if a previously pending grant is now active, update by annotating accordingly.

Other Support includes all financial resources, whether Federal, non-Federal, commercial or institutional, available in direct support of an individual’s research endeavors, including but not limited to research grants, cooperative agreements, contracts, and/or institutional awards. Training awards, prizes, or gifts do not need to be included. Effort devoted to projects must be reported in person months; indicate calendar, academic, and/or summer months associated with each project.

Use the suggested format shown below and continuation pages as necessary. The sample format below provides guidance regarding the type and extent of information that should be provided.

**Examples**

### NEW SENIOR/KEY PERSONNEL (D.2.b)

BENNETT, P.

**ACTIVE**

- Investigator Award (Bennett)
- Howard Hughes Medical Institute
- Gene Cloning and Targeting for Neurological Disease Genes
- This award supports the PI’s program to map and clone the gene(s) implicated in the development of Alzheimer’s disease and to target expression of the cloned gene(s) to relevant cells.

- 5 R01 HG 000000-07 (Daumier)
- NIH/NHGRI
- Identification of the Risk Factor Genes for Alzheimer’s Disease

- The major goals of this project are to identify of new Alzheimer’s disease genes and predicting Alzheimer’s disease.

- (THIS AWARD)
- 2 R01 HL 000000-14 (Anderson)
- NIH/NHLBI
- Chloride and Sodium Transport in Airway Epithelial Cells

OVERLAP No Overlap
CHANGES IN OTHER SUPPORT (D.2.c)

ANDERSON, R.R.
ACTIVE

(THE AWARD)
2 R01 HL 000000-14 (Anderson) 3/1/2002 – 2/28/2017 3.6 calendar
NIH/NHLBI $186,529

The major goals of this project are to define the biochemistry of chloride and sodium transport in airway epithelial cells and clone the gene(s) involved in transport.

ANDERSON, R.R.
INACTIVE

DCB 950000 (Anderson) 12/1/2008 – 11/30/2011 2.4 calendar
National Science Foundation $82,163

The major goals of this project are to define biochemical properties of liposome membrane components and maximize liposome uptake into cells.

HERNANDEZ, M.
ACTIVE

5 R01 CA 000000-08 (Hernandez) 4/1/2007 – 3/31/2017 3.6 academic
NIH/NCI $110,532

The major goals of this project are to use viral strategies to express the normal p53 gene in human SCLC cell lines and to study the effect on growth and invasiveness of the lines.

5 R01 HL 000000-04 (Baker) 4/1/2012 – 3/31/2016 1.2 calendar
NIH/NHLBI $122,717

The major goal of this project is to study chloride and sodium transport in normal and diseased lungs.

R000 (Anderson) 9/1/2001 – 8/31/2016 1.2 calendar
Cystic Fibrosis Foundation $43,123

The major goals of this project are to identify and isolate airway epithelium progenitor cells and express human CFTR in airway epithelial cells.

R01 DK000000-01 (Zimmerman) 9/1/2015 – 8/31/2019 1.2 calendar
NIH/NIDDK $187,265

The major goals of this project are to determine how CFRD contributes to lung function decline.
The major goals of this subproject are to define the p53 mutations in SCLC and their contribution to tumor progression and metastasis.

OVERLAP There was scientific overlap between aim 2 of 5 R01 CA 00000-08 and aim 4 of project 2 in 5 P01 CA 00000-02. In conjunction with agency staff, it was decided to remove aim 4 of project 2 from the P01 and adjust the budget and PI level of effort accordingly.
