

For a Renewal or Revision Application including Postdoctoral Training, Only

Submit the tables indicated: 1^{R/R}, 2, 3, 4, 5B, 6B^{R/R}, 7B, 8B, 9B^{R/R}, 10, 11, 12B

The Instructions and Sample Data Tables file includes example data, and detailed instructions and rationale statements for each table. These are designed to print best in landscape mode. The Blank Data Tables file provides fillable format pages.

Table 1. Membership of Participating Departments and Programs (Renewal/Revision Applications)

OMB Number 0925-0001 and 0925-0002 (Rev. 10/15 Approved Through 10/31/2018)

Participating Department or Program	Faculty Members In Department or Program	Faculty Members Participating in This Application	Predocctoral Trainees in Department or Program [Supported by Any NIH Training Grant]	Predocctoral Trainees With Participating Faculty Total (TGE) A/B/C	Predocctoral Trainees Supported by This Training Grant Total (TGE) A/B/C	Postdoctoral Trainees in Department or Program [Supported by Any NIH Training Grant]	Postdoctoral Trainees With Participating Faculty Total (TGE) A/B/C	Postdoctoral Trainees Supported by This Training Grant (TGE) A/B/C
Dept. of Biology	45	14	38 [15]	12 (6) 1/1/0	2 (2) 1/0/0	50 [5]	15 (7) 1/0/0	2 (2) 0/0/0
Neuroscience Program	32	20	31 [20]	14 (7) 2/0/1	4 (4) 0/1/0	40 [7]	23 (10) 0/0/1	2 (2) 1/0/0
Dept. of Pharmacology (Medical School)	25	5	30 [10]	5 (3) 1/0/0	3 (3) 0/0/0	28 [0]	12 (6) 0/0/1	0 (0) 0/0/0
Totals	Need not sum	Need not sum	99 [45]	31 (16) 4/1/1	9 (9) 1/1/0	118 [12]	50 (23) 1/0/2	4 (4) 1/0/0

Table 1 Instructions: Provide the total number of current faculty members, predoctoral trainees, and postdoctoral trainees in each participating department/program. Faculty members may be counted more than once if they participate in a departmental as well as an interdepartmental program(s). Predocctoral and postdoctoral trainees are counted only once and should be associated with a single department or program. In brackets, indicate the number of predoctoral trainees and postdoctoral trainees who are supported by **any** NIH training grant. Indicate the number of faculty members participating in **this** training grant application, and the numbers of predoctoral and postdoctoral trainees with the participating faculty. Include the number of trainees currently supported by **this** training grant. In parentheses, put the number of trainees with the participating faculty who are Kirschstein-NRSA training grant eligible ([TGE](#)). Include the number of TGE predoctoral and postdoctoral trainees who are from underrepresented groups that fulfill the diversity requirement: TGE predoctoral and postdoctoral trainees who are underrepresented minorities (Group A), who are individuals with disabilities (Group B), or who are individuals from disadvantaged backgrounds (Group C). Individuals may be counted in more than one of these groups if applicable. Data on Group C may not be required by the specific instructions in the FOA to which you are responding.

Summarize these data in the Background Section 2.2 of the Research [Training Program](#) Plan. Use the narrative to comment on the organization of the training program, the participating departments/programs, the extent to which faculty and students from those departments/programs participate in the program of activities to be supported by the training grant.

Rationale: This table provides insight into the environment in which training will take place. It allows reviewers to assess whether the program has the "critical mass" (trainees, faculty and other research personnel) and representation/distribution of scientific disciplines to be successful.

**Table 2. Participating Faculty Members
(Alphabetically by Faculty Member)**

OMB Number 0925-0001 and 0925-0002 (Rev. 10/15 Approved Through 10/31/2018)

Name/Degree(s)	Rank	Primary (& Secondary) Appointment(s)	Role in Program	Research Interest
Abrams-Johnson, Jane, PhD	Asst. Prof.	Pharmacology; (Biochemistry-Medical School)	Mentor	Regulation of Synthesis of Biogenic Amines
Jones, Lisa S., MD	Res. Asst. Prof.	Microbiology and Immunology (Neuroscience Program)	Mentor Exec Com	Protein Structure, Folding, and Immunogenicity
Sandoz, J. Miguel, MD, PhD	Assoc. Prof.	Neuroscience Program	Mentor	Developmental Genetics in Drosophila
Thomas, C. James, III, PhD	Prof. & Chr.	Biochemistry and Molecular Biophysics	Program Director	Molecular and Genetic Analysis of RNA Viruses

Table 2 Instructions: List each training faculty member with his/her degree(s), academic rank, primary departmental affiliation and secondary appointments, role in the proposed training grant program, and research interests that are relevant to the proposed program.

Summarize these data in the Background Section 2.2 of the Research [Training Program](#) Plan. Use the narrative to comment on the distribution of mentors by academic rank and department, to discuss areas of research emphasis, and the rationale for the selection of participating faculty.

Rationale: This information allows reviewers to assess the distribution of junior versus senior faculty and clinical versus basic scientists participating in the training program, as well as their distribution by department. The data concisely summarize the scientific areas of the training faculty.

Table 3. Institutional Training Grant Support Available to Participating Faculty Members, Department(s), or Program(s)

OMB Number 0925-0001 and 0925-0002 (Rev. 10/15 Approved Through 10/31/2018)

Title of Training Grant	Funding Source Including Identifying Number	Active or Pending Project Period	Program Director (Department)	Predocctoral Trainees Supported This Year	Postdoctoral Trainees Supported This Year	Short-Term Trainees Supported This Year	Total No. of Participating Faculty (Number Overlapping)	Names of Overlapping Faculty
Bioimmunotherapy Training Grant	T32 CA05964-11	06/09-07/13	Baker, A. (Pathology)	12			25 (6)	Abelson Brown Fields Johnson Sung Watson
Pharmacological Sciences	T32 GM04823-01	Pending	James, C. (Pharmacology)	10			19 (3)	Jones Jenson Watson
Genetic Basis of Mental Illness	T32 MH02708-07	06/07-07/12	Johnson, A. (Psychiatry)	4	4		7 (2)	Johnson Watson
Interdisciplinary Training in Nanotechnology	Dept of Ed	Pending	Small, V. (Engineering)	6	0	2	12 (2)	Small Wee
Med into Grad	HHMI	Pending	Brown (Cell Biology)	4	0		10 (2)	Brown Jones
Totals	N/A	N/A	N/A	36	4	2	N/A	N/A

Table 3 Instructions: List all sources of current and pending training support available to the participating faculty members. It is not necessary to list every training grant at the institution, only those with overlapping faculty mentors or student pools. For each grant, include the title of the training grant; funding source and complete identifying number; status (active or pending) and dates of the active or pending project period; name of the program director and department; number(s) of training positions (predocctoral, postdoctoral, and short term), number of participating faculty members; and list overlapping participating faculty members who are also named in this application.

Rationale: This table will permit an evaluation of the level of support for training available to each of the participating departments/programs and the extent to which the proposed training grant overlaps with or duplicates available training grant support. It is useful in determining the number of training positions to be awarded.

**Table 4. Grant and Contract Support of the Participating Faculty Members
(Alphabetically by Faculty Member)**

OMB Number 0925-0001 and 0925-0002 (Rev. 10/15 Approved Through 10/31/2018)

Faculty Member	Faculty Member Role on Project and Grant Title	Source of Support Grant Number and Status	Project Period	Current Year Direct Costs Awarded (Total Direct Costs for Awards With Substantial Future Changes)
Jones, J.	PI - Structure and Function of Acetylcholine Receptors	NIH 1 R01 CA76259-01*	05/09-05/014	\$190,000
Jones, J.	PI - Purification & Identification of Receptors	NIH 5 K08 AI00091-03	11/10-11/13	\$140,000
Mack, T.	PI - Control of Angiogenesis	American Heart Assoc.	03/8-03/11	\$185,000
Mack, T.	Co-PI - Cell Culture Center	NSF PCM 80-12935 (D. Stockton, PD/PI)	12/10-12/13	\$180,000
Mack, T.	Project Leader of Subproject 4: "Genetic Control of Cell Division"	NIH 1 P01 CA71802-02 (D. Stockton, PD/PI)	10/07-10/12	\$165,000
Smith, J.		None		
Zachary, A.	PI – Human Monoclonal Antibodies as a Therapy for Staphylococcal Enterotoxin	NIH 1 U01 AI-28507-01*	07/09-07/14	\$200,000 (\$3 million)

Table 4 Instructions: For each participating faculty member, list active and pending research grant and contract support from all sources (including Federal, non-Federal, and institutional research grant and contract support) that will provide the context for research training experiences. Exclude research training grants. If none, state "None." Include the role of the participating faculty member (PD/PI, co-investigator, etc.) in the grant and grant title; source of support, grant number, and status (use an asterisk (*) to indicate pending sources of support); dates of the entire project period; and the current year annual direct costs. If the source of support is part of a multiple project grant (for example, a P01), additionally identify the PD/PI of the overall project, and provide the above information for that component of the grant with which the faculty member is associated. For grants with major budget changes in future years such as clinical trials, include the total direct costs of the award in parentheses. Do not list grants that have expired unless a pending continuation application has been submitted.

Summarize these data in the Program Plan Section 2.3.b Program Faculty. Analyze the data in terms of total and average grant support. Comment on the inclusion of faculty without research grant support and explain how the research of students that may work with them would be supported.

Rationale: This table provides evidence of the strength of the research environment, the availability of funds to support research conducted by the trainees, and the appropriateness of the participating faculty members in terms of their active research support.

**Table 5B. Postdoctoral Trainees of Participating Faculty Members
(Alphabetically by Faculty Member for the Past Ten Years)**

OMB Number 0925-0001 and 0925-0002 (Rev. 10/15 Approved Through 10/31/2018)

Faculty Member	Past / Current Trainee	Trainee Name (Where Training Occurred)	Postdoc Research Training Period	Prior Academic Degree(s)	Prior Academic Degree Year(s)	Prior Academic Degree Institution(s)	Title of Research Project	Current Position of Past Trainees / Source of Support of Current Trainees
Abbott-Miller, Jane	Past	Schwartz, A. (Cornell)	97-02	MD/PhD	97	U. of WI	Role of Transcription Factor X in Synaptic Plasticity	Asst. Scientist, Scripps Research Foundation
Abbott-Miller, Jane	Past	**Jones, J. (Cornell)	98-03	PharmD	96	Grinnell	Protein kinase signaling cascades in C elegans	Res. Assoc. Prof. Microbiol., U CA, Berkeley
Abbott-Miller, Jane	Past	Howard, R.	01-04	PhD	01	Purdue	Excision Repair in Multiple Myeloma Cells	Postdoc, Pathology, Yale, lab of I.M. Sickly
Abbott-Miller, Jane	Current	**Baker, A.	07-	MD	07	Cornell	Gene Expression in Drosophila	NIH 2 T32 GM05964-06
Abbott-Miller, Jane	Current	Smith, D.	08-	PhD	08	U. of CT	DNA Repair and Chemical Carcinogenesis	NIH 1 F32 ES06942-01
Abbott-Miller, Jane	Current	Haggerty, D.	09-	PhD	08	U. of MI	Cell Cycle Control in Yeast	NIH 1 R01 CA76259-01
Zyskind, J. Quincy	Past	None						
Zyskind, J. Quincy	Current	Bunting, C.	08-	DMD	08	Vanderbilt	Title not yet determined	NIH 1 T32 GM05066-05

Table 5B Instructions: For each participating faculty member, list in groups all past and current postdoctoral trainees for whom the faculty member was/is the sponsor (**past 10 years only**). Indicate in parentheses under the trainee name where the postdoctoral training with the faculty member occurred, if at a different institution. Exclude medical interns and residents unless they are heavily engaged in laboratory research. For each trainee indicate period of postdoctoral training and any degree received; previous institution, degree, and year awarded prior to entry into training; title of the research project; and for past trainees, their current positions; or for current trainees their source of

support. **Designate Kirschstein-NSRA training grant eligible trainees (TGE) by an asterisk (*). In renewal applications, denote trainees who were or are supported by this training grant with a double asterisk (**).**

Summarize these data in the Program Plan Section 2.3.b Program Faculty. Analyze the data in terms of the overall experience of the faculty in training postdoctoral trainees. Comment on the inclusion of faculty whose training records may not indicate much recent postdoctoral training experience.

Rationale: The data in this table permit an evaluation of the success of the proposed faculty in facilitating the progression of students in their research careers, the ability of the faculty to commit appropriate time to mentoring additional trainees, and the institutions from which their trainees are selected.

**Table 6B. Publications of Research Completed by Postdoctoral Trainees (Renewal/Revision Application)
(Group Past and Current Trainees Separately, then sort by Year of Entry)**

OMB Number 0925-0001 and 0925-0002 (Rev. 10/15 Approved Through 10/31/2018)

Name of Trainee (Years in Program)	Past / Current	Mentor(s)	Publication (Authors, Year, Title, Journal)
Green, V.* (2005-2008)	Past	Smith	Green, V. and Smith, S., 2006, "Repeated Sequences in Xenopus," J. Mol. Biol., 244:103-110. Smith, S., Watkins, J.D., and Green, V. , 2007, "Tolerance to Alloantigens in Frogs," Am. J. Anat., 146:156 (abstract).
Thomas, P* (2005-2007)	Past	Berg	Miter, M.H., Owens, R., Thomas, P. , and Berg, L., 2006, "Insulin Deficiency in Diabetic Rats," J. Nutrition, 373:350-378.
Schultz, H. (2006-2008)	Past	Easygai	No Publications
Samuels, J.* (2009-)	Current	Peters	Samuels, J. and Peters M., 2009, "Molecular Analysis of DNA Viruses," Molecular Biology of the Cell, Vol. 11, 12-18.
Greenstuff, M.* (2010-)	Current	Chew	Greenstuff, M. , and Chew, J., 2010, "Non-digestible fibre influences bioavailability of vitamins", J. Pharm Sci. (In press).
Jones, W.* (2010)	Current	Newpeeye	No Publications

Table 6B Instructions: For Renewal (Type 2) Applications

Read FOA, SF424 (R&R) Application Guide Section 8, and [Introduction to NRSA Data Tables](#) first.

For Renewal/Revision applications, list publications of ALL postdoctoral trainees currently or [previously supported](#) by the training grant and all other representative trainees clearly associated with the [training program](#). Include trainees appointed/representative for the past 10 years. Group past trainees separately from current trainees. Sort each group by their year of entry into postdoctoral training with their current faculty mentor or association with the program. In parenthesis, include the year they began their training and, if appropriate, the year they completed training. Designate Kirschstein-NSRA training grant eligible trainees ([TGE](#)) by an asterisk (*). Designate those supported by this training grant with a double asterisk (**). Indicate the trainee's current mentor(s), if chosen. List All publications of trainees resulting from work during their period of postdoctoral training in the faculty member's laboratory or in association with the training program, regardless of when the publication actually appeared. List abstracts only if a more complete publication has not appeared and label these clearly as abstracts. List publications followed by abstracts in chronological order. Boldface the trainee's name in the author list.

For renewal applications, to comply with NIH public access policy, NIH will request a MyBibliography report Just-in-time for all publications listed in Table 6 that arose from work conducted by the trainee while supported by the training grant. Note that the MyBibliography report (http://www.nlm.nih.gov/pubs/techbull/nd12/nd12_myncbi_pdf.html), is not required at the time of submission, and will be requested prior to award.

Summarize these data in the body of the proposal. For example, what is the average number of papers published by trainees, how many first author, what has been the impact of these publications on their field of science.

Rationale: This information provides an indicator of trainee productivity, research quality, and priority of authorship; and the success of faculty members in facilitating postdoctoral trainee publication.

Table 7B. Admissions and Completion Records for the Participating Departments and Programs During the Past Five Years (Postdoctoral Applicants)

OMB Number 0925-0001 and 0925-0002 (Rev. 10/15 Approved Through 10/31/2018)

Table 7B Instructions: For each participating department/program for each of the past 5 years, list the following information: number(s) of individuals who have formally applied for training; have been accepted for admission; enrolled; are still in the program; completed the program; and left the program. In parenthesis put the number of these trainees in each group who were Kirschstein-NRSA training grant eligible ([TGE](#)). Where indicated, include the number of the TGE trainees who were underrepresented minorities (Group A), the number of the TGE trainees who were individuals with disabilities (Group B), and the number of the TGE trainees who were individuals from disadvantaged backgrounds (Group C). Data on Group C may not be required by the specific instructions in the FOA to which you are responding. For those who left the program without completing their training, include the reason for leaving the program. Sort data by

department/program, year of application, and previous doctoral degree type of entering trainees. For programs with multiple entering department/program trainee pools, provide totals for each year, and sums and averages.

Programs that select postdoctoral trainees exclusively from candidates who apply to academic department(s) or programs (e.g., Department of Hematology or Interdepartmental Program in Cancer Therapeutics), please provide data for each participating department/program. Include only those postdoctoral applicants who could be considered candidates for the proposed [training program](#). Programs that select trainees exclusively from candidates who are recruited directly to the laboratories of the proposed faculty mentors should list only those candidates who were actually in the laboratories of the faculty mentors and considered for the program. Please indicate in a footnote which system of recruitment is used by this program. **Applicants are strongly urged to contact IC staff mentioned in the FOA for guidance on what data to include in this table.**

Summarize these data in the Program Plan Section 2.3.e Trainee Candidates. Analyze the data in terms of the overall numbers of potential trainees, their sources and trends, their eligibility for Kirschstein-NRSA support, diversity, and overall success in completing the training program.

Rationale: These data permit evaluation of the abilities of the participating departments/programs to recruit and retain postdoctoral trainees through the completion of their training. The data permit separate analyses of total trainees, TGE trainees, and the diversity of the trainees. These data are useful in determining the selectivity of the admissions process, the success of recruitment and retention of trainees from diverse backgrounds, and the appropriate number of training positions to be awarded.

Table 8B. Qualifications of Recent Postdoctoral Applicants

OMB Number 0925-0001 and 0925-0002 (Rev. 10/15 Approved Through 10/31/2018)

Year	Department/ Program	Applicant (List by Number)	Previous Institution	Degree(s) & Year(s)	Doctoral Thesis or Other Research Experience & Research Advisor (if relevant)	Residency Training Institution PGY	Offered Position (Y/N)	Entered Program (Y/N)	Support from this Grant (Y/N)
2010	Pathology	1*	U. of WI	DVM '08	Inhibitors of Nitric Oxide Synthase; James, L.	Pathology Cornell Vet PGY2	Y	Y	Y
2010	Pathology	2*	Stanford	MD '09	Pharmacogenetics of anesthetics in wound healing; Jones, J.	Anesthesiology UCSF PGY1	Y	N UNC	N
2010	Pathology	3	Yale U.	MD '09	G Protein Coupled Receptors; Wilson, G.	Pediatrics Harvard PGY1	Y	N	N
2010	Molecular Biophysics Program	1*	U. of IL	PhD '09	Developmental Genetics in Drosophila Smith, J	N/A	Y	Y	Y
2010	Molecular Biophysics Program	2*	Rutgers	PhD '7	Regulation of NF-kB; Felman, R.	N/A	Y	Y	Y
2010	Molecular Biophysics Program	3	Berkeley	PhD '09	Molecular and Genetic Analysis of RNA Viruses; Thomas, JC	N/A	Y	Y	N
2010	Molecular Biophysics Program	4*	Baylor	MD '08	P53 mutations; Johns, L	Oncology Mount Sinai PGY2	Y	N UCSD	N
2010	Molecular Biophysics Program	5*	Tufts U.	PhD. '07 MD '09	Genetics of Neuronal Cell Division; Crocker, S	Neurology MGH PGY1	N	N	N
2010	Molecular Biophysics Program	6	U. of Kyoto	DPhil'08	Regulation of Gene Expression; Roberston	N/A	N	N	N

Table 8B Instructions: List the qualifications and application outcomes of recent postdoctoral applicants to each participating department/program for the most recent year. Data may be included for an additional year, if desired, and may be helpful in the case of

small, variable applicant pools. Applicants should be listed anonymously and identified by a number in sequence, rather than by name, to safeguard privacy. Indicate applicants who are Kirschstein-NRSA training grant eligible ([TGE](#)) with an asterisk (*). For each applicant, provide: previous institutions(s) attended, degree(s) and year awarded; thesis research topic or other research topic (if relevant) and research advisor; and residency training (when appropriate), including area of specialization, institution, and PGY. Indicate whether applicants were or were not offered admission and whether they entered the program. For renewal, indicate those applicants who have been or are currently supported by this grant. Sort applicants by department/program, year of application (if data on more than one year are included), and then list those who entered followed by those who did not enter.

Programs that select postdoctoral trainees exclusively from candidates who are recruited to academic department(s) or programs (e.g., Department of Hematology or Interdepartmental Program in Cancer Therapeutics), should provide data for each participating department/program. Include only those postdoctoral applicants who could be considered candidates for the proposed [training program](#). Programs that select trainees exclusively from candidates who are recruited directly to the laboratories of the proposed faculty mentors should list only those candidates who are in the laboratories of the faculty mentors and considered for the program. Please indicate in a footnote which system of recruitment is used by this program. **Applicants are strongly urged to contact IC staff mentioned in the FOA for guidance on what data to include in this table.**

Summarize these data in the Program Plan Section 2.3.e Trainee Candidates. Analyze the data in terms of the overall numbers of potential trainees, their previous training, and credentials.

Rationale: The data provided in this table will permit an evaluation of the quality and depth of the applicant pool. The data permit separate analyses for TGE and non-TGE applicants. These data are useful in determining the selectivity of the admissions process, the competitiveness of the program, and the appropriate number of training positions to be awarded.

Table 9B. Qualifications of the Current Postdoctoral Trainees Clearly Associated with the Training Program (Renewals/Revisions)

OMB Number 0925-0001 and 0925-0002 (Rev. 10/15 Approved Through 10/31/2018)

Department / Program	Trainee (List by Number)	Previous Institution(s)	Degree(s) & Year(s)	Doctoral Thesis or Other Previous Research Experience & Research Advisor (If Relevant)	Residency Training Institution	Current Research Mentor	Years in Program	Calendar Years Appointed to This Grant
Clin Pharm	1*	U. Penn	DVM '07	Pharmacogenetics of anesthetics in wound healing. Jones, J.	Anesthesiology U. Penn	Smith	'09-present	2009
Neurosci	2*	Vanderbilt University	MD. '05	G Protein Coupled Receptors Wilson, G.	Neurology U. Michigan	Green	'07-present	2009
Neurosci	3*	U. of Michigan	MD '08	Physiology of CCK Evans, K.	Internal Medicine U. Washington	Jones	'08-present	2010
Biochemistry	4*	Washington U.	PhD '04 MD '06	Inhibitors of Nitric Oxide Synthetase James, L.	Cardiology UTSW	Johnson	'08-09	2009-2010
Medicine	5*	Duke University	PhD '08	Regulation of NF-kB Felman, R.		Diaz	'08-present	2010
Pathology	6	Emory University	MD '08	None	Hematology UAZ	Valentino	'09-present	2009

Program Statistics

Total Number of Trainees	Number of TGE Trainees
6	5

Table 9B Instructions: List the qualifications of ALL postdoctoral trainees currently participating in the activities of the program (including trainees who have not yet chosen a mentor), regardless of source of support or year of training. Trainees should be listed anonymously and identified by a number in sequence, rather than by name, to safeguard privacy. Indicate applicants who are Kirschstein-NRSA training grant eligible (TGE) with an asterisk (*). For renewal applications, include all trainees supported by the training grant in any year of their studies and designate them with a double asterisk (**). Include also equivalent trainees from the same training cohort who were not supported by the training grant. For new applications, include trainees whose training experience is similar to that for the proposed training grant program. For each trainee, list: department/program of entry; previous institution(s), degree(s) and year awarded; thesis research topic or other previous research experience (if relevant) and research advisor; current research mentor; and years in the program. For renewal applications, list years of support for those appointed to the training grant. Sort trainees by year of admission into the program, then by department/program through which they were recruited. Group Kirschstein-NRSA training grant eligible (TGE) trainees first, followed by non-TGE trainees. At the bottom of the table, include summary totals for all trainees and TGE trainees.

Programs that select postdoctoral trainees exclusively from candidates who are recruited to academic department(s) or programs (e.g., Department of Hematology or Interdepartmental Program in Cancer Therapeutics) should provide data for each participating department/program. Include only those postdoctoral applicants who could be considered candidates for the proposed [training program](#). Programs that select trainees exclusively from candidates who are recruited directly to the laboratories of the proposed faculty mentors should list only those candidates who are in the laboratories of the faculty mentors and considered for the program. Please indicate in a footnote which system of recruitment is used by this program. **Applicants are strongly urged to contact IC staff mentioned in the FOA for guidance on what data to include in this table.**

Summarize these data in the Program Plan Section 2.3.e Trainee Candidates. Analyze the data in terms of the overall numbers of potential trainees, their previous training, and credentials.

Rationale: These data are useful in determining the number and quality of all trainees currently associated with the program, and their distribution by department and mentor. For renewal applications, these data highlight the selectivity of appointments to the training grant over time. These data are useful in determining the appropriate number of training positions to be awarded.

Table 10: Admissions and Completion Records for Underrepresented Minority (URM) Trainees, Trainees with Disabilities, and Trainees from Disadvantaged Backgrounds Clearly Associated With the Training Program

OMB Number 0925-0001 and 0925-0002 (Rev. 10/15 Approved Through 10/31/2018)

Diversity Recruitment Group	Trainee (List by Number)	Entering Year (Pre/Post)	Department / Program	Source of Support and if Support by NRSA Grant	In Training	Completed Training	Left Without Completing Training	Current Status Career or Employment
URM Trainees	1*	2008 (Pre)	Genetics	T32 GM001122 F31		Y		Postdoctoral Trainee UCSF
URM Trainees	2*	2009 (Post)	Cell Biology	University Fellowship Research			Y	Mentor and student both moved to another institution
URM Trainees	3*	2009 (Post)	Chemistry	Lectureship	Y			
Trainees With Disabilities	1*	2005 (Pre)	Pharmacology	T32 GM001144 F31		Y		Postdoctoral Trainee NYU
Trainees With Disabilities	2*	2008 (Post)	Cell Biology	R01			Y	Career Change
Trainees With Disabilities	3	2009 (Post)	Medicine	Research Associate	Y			
Trainees From Disadvantaged Backgrounds	1*	2007 (Pre)	Genetics	T32 GM001155 F31		Y		Postdoctoral Trainee U. Chicago

Table 10 Instructions: List anonymously by number all underrepresented minority (URM) trainees, trainees with disabilities, and trainees from disadvantaged backgrounds (previously defined) who have been or are currently clearly associated with the [training program](#) for the past 5 years, regardless of their source of support. For renewal applications, include all trainees supported by the training grant in any year of their studies and include equivalent trainees from the same training cohort. For New Applications, include trainees whose training experience is similar to that for the proposed training grant program. Indicate their [year of entry](#), whether predoctoral or postdoctoral trainee, entering department/program, and all sources of support during their training with the program (bold grant number if for this training grant). Indicate their current status (i.e., in training, completed training, or left without completing training). For those who have left the program or completed training, include information about their subsequent career development or employment. Indicate Kirschstein-NRSA training grant eligible (TGE) trainees with an asterisk (*). For mixed training grant programs, list predoctoral trainees first and then postdoctoral trainees in each diversity category.

Summarize this data in Research Training Program Plan Section 2.4 Recruitment and Retention Plan to Enhance Diversity.

Rationale: The data provided in this table will permit evaluation of the success of the program in recruiting and retaining URM trainees, and analysis of their support, and begin to establish a record of NIH training of other Diversity Recruitment groups.

Table 11. Appointments to the Training Grant For Each Year of the Past Award (Renewal Applications Only)

OMB Number 0925-0001 and 0925-0002 (Rev. 10/15 Approved Through 10/31/2018)

Grant Year	2005-2006	2006-2007	2007-2008	2008-2009	2009-2010
Predoctoral Positions Awarded (Months of Support)	10 (120)	12 (144)	14 (168)	14 (168)	14 (168)
Predoctoral Trainees Appointed (Months of Support Used)	10 (120)	13 ^a (144)	14 (168)	13 ^b (156)	14 (168)
Predoctoral URM Trainees Appointed (Months of Support)	1 (12)	2 (24)	(0)	1 (12)	1 (12)
Predoctoral Trainees with Disabilities Appointed (Months of Support)	1 (12)	0 (0)	1 (12)	2 (12)	0 (0)
Predoctoral Trainees from Disadvantaged Background Appointed (Months of Support)	0 (0)	0 (0)	0 (0)	0 (0)	1 (12)
Postdoctoral Positions Awarded (Months of Support)	4 (48)	4 (48)	4 (48)	4 (48)	4 (48)
Postdoctoral Trainees With MD Appointed	1	1	2	1	2
Postdoctoral Trainees With MD/PhD Appointed	2	1	1	0	0
Postdoctoral Trainees With PhD Appointed	1	1	0	1	2
Postdoctoral Trainees With Other Degree Appointed	0	DrPH	DrPH	PharmD	0
Postdoctoral Trainees Appointed (Months of Support Used)	4 (48)	4 (48)	4 (48)	3 (38) ^c	4 (48)
Postdoctoral URM Trainees Appointed (Months of Support)	1 (12)	2 (24)	0 (0)	1 (12)	1 (12)
Postdoctoral Trainees with Disabilities Appointed (Months of Support)	0 (0)	0 (0)	0 (0)	0 (0)	0 (0)
Postdoctoral Trainees from Disadvantaged Background Appointed (Months of Support)	0 (0)	0 (0)	0 (0)	0 (0)	1 (12)

^a One trainee left after 6 months and a second trainee was appointed for the remainder of the year.

^b One position was not filled.

^c A fourth trainee was appointed, but fell ill and dropped out after 2 months. It was then too late to recruit a replacement trainee.

The sample data is for Institutes that allow trainees to be appointed for less than 12 months in a given budget year. Institute policies may vary. Check with the relevant IC specific program announcements and instructions.

Table 11 Instructions: For each year of the grant since the last competing application, list the following: 1) total number of positions awarded in each training category and in parenthesis the number of months; 2) number of predoctoral trainees appointed and in parenthesis the number of months of support used; and 3) number of postdoctoral trainees appointed, with entering degrees, and in parenthesis the number of months used. Delete rows that are not relevant to the type of training support awarded. For both types of training position, indicate the number of trainees from underrepresented groups who are appointed and in parenthesis the months of support used. If any trainee positions were not filled, provide the reason in a footnote.

Summarize this data in Research [Training Program](#) Plan Section 2.6 Progress Report. It may be useful to mention this under Section 2.4 Recruitment and Retention Plan to Enhance Diversity as well.

Rationale: For renewal applications, the data provided in this table permits evaluation of the utilization of awarded training positions.

Table 12B. Postdoctoral Trainees Supported by This Training Grant (Renewal/Revision Applications and Non-Competing Continuation Progress Reports Only)

OMB Number 0925-0001 and 0925-0002 (Rev. 10/15 Approved Through 10/31/2018)

Postdoctoral Trainees (Listed Sequentially by Year of Entry)

Enter Source(s) of Support and Academic Year for Each Grant Year

Trainee, Year of Entry, Prior Degree & Institution (Mentor – Department / Program)	Grant Year -01 00-01	Grant Year -02 01-02	Grant Year -03 02-03	Grant Year -04 03-04	Grant Year -05 04-05	Grant Year -06 05-06	Grant Year -07 06-07	Grant Year -08 07-08	Grant Year -09 08-09	Grant Year -10 09-10	Title of Research Project or Research Topic	Degree or Certification (Year) or Other Relevant Outcome	Current Position and Institution (Grant Support Obtained)
Jones, C., 2003 MD, CWRU (Wu-Pharmacology)				PGY 1	PGY 2	TG	TG	PGY 5			Membrane Structures	N/A	Assistant Professor (Dept. Pharmacology) (R01 NIMH)
Rivera, M., 2004 MD-PhD, Yale (Frank-Pharmacology)					PGY 1	PGY 2	TG	TG	CCF	PGY 6	Transdermal Pharmacodynamics	Certificate of Clinical Investigation 2006	Pediatric Resident
Stone, V. 2006 PhD, Harvard (Hahn-Medicine)							TG	TG	RG	RG	Genetic Variation in Fruit Fly Nymphs	N/A	In Training

Table 12B Instructions: List sequentially, by [entering year](#), all trainees who were or are currently supported by this training grant. For previous trainees, include up to the previous 10 years. For each trainee, provide: 1) name; 2) year of entry into the [training program](#); 3) prior institution and degree at entry; 4) in parenthesis name of research mentor and department/program; 5) source of support during each year of training, e.g., this training grant, another training grant (specify), research grant, university fellowship, individual fellowship (specify), etc.; 6) research topic; 7) degree or certifications or other relevant outcomes completed during training and year awarded, and 8) for trainees who have completed the program, their current positions, rank and/or title and institutional affiliations, and grants obtained, if any. Enter all trainees who received support from this grant, including those who did not complete the training program for any reason.

For Non-Competing Continuation Progress Reports, provide updated trainee information, reflecting new appointments and other changes over the reporting period. Do not include data that is older than ten years.

Explain coding of source of support in a footnote. For example: TG = this training grant, RG = research grant, UF = university funds, TG2 = another training grant (Neuroscience training), PGYn = postgraduate year (n) of internship or residence; F = individual fellowships (e.g. university fellow, NRSA, NSF, foundations, etc.); CCF = cancer clinical fellowship.

For Noncompeting Continuation Progress Reports, summarize this data under Research Training Program Plan Section 2.6.

Rationale: For renewal applications, this table provides detailed information about how postdoctoral training positions are used (i.e., distribution by mentor, year in program, years of support per trainee). The data also permit an evaluation of the success of the program in achieving the training objectives of the prior award period(s) for up to 10 years.
