Company Profile

Industry Sector: Over-the-counter health aides

Company Overview: Lynx Design was founded to develop socially conscious products that improve the quality of life for individuals and communities. Its interdisciplinary, multi-talented team possesses a deep understanding of the needs of tremor patients, and the technical know-how to forge new technologies that provide them with real world solutions.

Target Market(s): Essential Tremor and Parkinson's Disease patients worldwide, including "influencers" – physicians, family, and caregivers who may recommend assistive devices to the end users.

Product Family: QUIESSE is the family of products designed to assist individuals with tremors.

Key Value Drivers

Technology: QUIESSE employs small, low-cost sensors and actuators to mechanically cancel tremor from the implement the user is holding. Its sophisticated control logic distinguishes and preserves the individual's intended motion, enabling patients to be more independent, frustration-free, and liberate them from the social isolation they experience.

Competitive Advantage: The QUIESSE assistive device is the only technology to employ active cancellation of undesired hand tremors versus Deep Brain Stimulation surgery, chronic medications, or suppressive devices that tend to limit free range of motion. Packaged in a compact, handheld form factor, this non-implanted device is cost effective and easily accessible to those who struggle performing their everyday activities due to hand tremors.

Plan & Strategy: Enter the market as a consumer device and single product to expedite development and minimize time to market. In the future, keep open to possibility of a strategic partnership to pursue clinical applications.

Management

Leadership:

Anupam Pathak, Ph.D., P.E. – Founder and CEO

Steven Marsh, P.E. – Director of Product Development

C. Mario Gonzalez – CFO

Scientific Advisory Board:

Praveen Kankariya – Founder and CEO, Impetus Technologies – technology R&D industry, >1000 employees.

Saroj Pathak – 40+ years in semiconductors at numerous industry-shaping startups, domestically and abroad.

Product Pipeline
