

To National Institutes of Health

God creates life in the most beautiful way, why would mankind try to play God and try to create something half animal and half human. It makes me so sad to even think about it, that I cry. We must be crying when we mess with creation. Why would we spend federal dollars on such as this? Who do we think we are? May we place our hope and our trust in our Creator and our Redeemer Jesus. Jesus, we trust in you! God bless your decisions.
