

8-31-16

I object strongly to the NIH's proposal to rescind its moratorium on funding of research involving human-animal chimeras. No good can come from the grossly unethical use of embryonic stem cells.

Furthermore, this proposed research raises all the ethical problems related to the creation of human-animal beings with partly or substantially human brains and/or human gametes. I do not want my tax dollars being used for grossly unethical research.

Sincerely,

Anthony Gallegos
Anthony Gallegos M.T.S.
