

To All Concerned

Aug 15, 2016

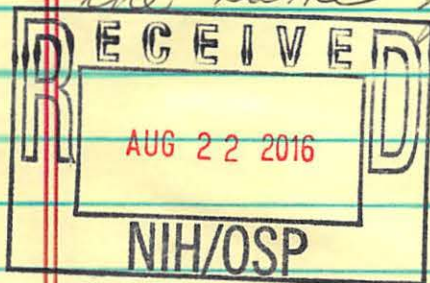

I am very concerned in regard
of the research involved with combining
Human embryonic stem cells with
animal cells.

Cease and desist this abominable research
It is imperative scientific studies realize
the criminality of such studies.

First, in this event possible killing of
human embryos is involved is grievously
serious. We do not kill little boys
and girls for experimentation. Natural
law abidance is imperative —

and what could be the end product —
I am opposed to spending tax provided
funds from us for this purpose —

My letter was not strong enough to
emphasize what I mean but all
the same you know I am very serious
