To Whom It May Concern:

I VEHEMENTLY OPPOSE THE MIXING OF HUMAN CELLS WITH ANIMAL CELLS FOR WHATEVER PURPOSES!

It is highly unethical and morally offensive to us human beings.

The human species is superior to the animal species and to subjugate a superior to an inferior object is to defile our human nature in the most debase and depraved way.

I also vehemently oppose and strongly object to using my tax dollars for this draconian and frightening research!

Whether you agree or not, on a deeper level, human nature has a divine nature to it besides its physical aspect.

In other words, we are spirits and souls. Animals are not.

PLEASE STOP THIS RESEARCH. IT'S INSANE!

Respectfully,

Doris da Silva
