

Sept 2, 2016

Dear Office of Science Policy Comments,

It is unthinkable that such macabre, unorthodox experimentation is being considered using human + animal cells, DNA and materials from laboratories!

I strongly object to the creation of such creatures: Chimeras.

Humans are human + animals are animals! Where is the public discussion + morality concerns we need presented - What RUSH is there to dump TAXPAYER money into such horrible experiments.

I am a TAXPAYER.

I am going to follow this matter - KEEP THE MORATORIUM in place -
