I am writing to ask you to not lift restrictions regarding experiments that use human cells to create embryos that are part human and part animal. I am committed to respecting human life as a natural God given creation. I believe that it is unique and wonderful and that it should be respected as it was formed. I do not agree that parts of it should be open to experimentation with lesser form of life. Please respect my plea and do not allow this type of scientific procedure to be allowed. I am a Deacon in the Catholic Church as well as a professional licensed mental health and substance abuse therapist with a master's degree from Creighton University. This type of action is totally against our beliefs and I believe we have no right to "mess" with what God created. Please consider more restrictive measures rather than less restrictive controls.

Lonnie R. Dinneen

PS: I AM ALSO A JET RAN!
