

Please Stop any nd all research that deals with mixing any stem cells from humans with any nd all animal forms.

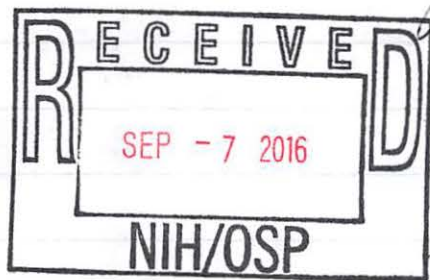

I do not want any of my tax payer money going towards this type of research.

There are enough good avenues to use for the much needed research into similar areas that do not cross these moral areas.

I'm writing but many, many of my friends believe the same way.

Please stop the "insanity" in the name of research.

I work hard for my money nd don't want you NIH abusing it!

Respectfully

Mary Puent
