To Whom It May Concern

Ref: Revision of guidelines for stem cell research--NIH Guide Notice NOT-OD-16-128

As a member of the human race and as a God-created creature consisting of mind, body and soul, I oppose lifting the ban prohibiting human pluripotent stem cell into the next state of primate embryos. This will open even more the Pandora's box of genetic horrors that will eventually result in all lost of human dignity and design. Everything I know about our creation tells me this is a step in the wrong direction for the human race as we know it and could ultimately lead to consequences this generation has not even imagined.

In this case, the ends will never justify the means.

Respectfully,

*Bro. Richard L. Dickerson*  
Bro. Richard L. Dickerson, Pastor
